DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Barnhart 5,447,331. Barnhart shows wheeled vehicle having a bottom chassis; a top chassis, which is coupled to the bottom chassis so that it is able to turn about a vertical axis; an operating arm coupled to the top chassis (col. 1, lines 15-17); an axle, which is coupled to the bottom chassis so that it can oscillate about a longitudinal axis of the vehicle; a plurality of wheels disposed on the axle; blocking means 131 disposed between the bottom chassis and the axle for angularly blocking the axle about the longitudinal axis with respect to the bottom chassis; a circuit (figs. 1-3) to activate the blocking means and inhibit oscillation of the axle about the longitudinal axis; and an angle sensor (col. 2, lines 23-37) for supplying a signal indicative the angular position of the operating arm about the vertical axis with respect to the bottom chassis.

As concerns claim 2, Barnhart shows the circuit comprises a blocking means switch 50 for activating the blocking means according to the signal.

Allowable Subject Matter

3. Claims 3-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
